Forced Induction

I know what your thinking, "How come you dont have any REAL kits listed??" i know i get annoyed looking for performance parts on websites and only find suggestions. I know we all want to see a real kit with a real pricetag. Although neither of these companies makes a kit for the 2.8 or the 3.1, somebody DOES make a kit for the 3.8 in the Camaro and this kit will bolt up to a 3.4 that was offered in the Camaro as well. As soon as i find out who it is that makes this kit, i will investigate and post my findings on this page.
